Comments: What part of " NO , NO , NO , NO !!!!! " , are you having problems understanding. If this crap is so safe to store, then store it back East in a coal mine or something like that. The nuclear power plants are back East and they get the benefit of the electricity, so why transport their garbage to us. We don't want it. How can a government that's only 225+ years old, promise that this crap will be safe for 10,000 years, given the government's past record.
